ABOUT US

M&M Oil Tools has proudly served the oil and gas industry since 1944, delivering high-performance tools designed to increase reliability, simplify maintenance, and provide lasting value. From the beginning, our focus has been on solving real-world challenges with innovative, dependable solutions.

We are committed to serving our customers with excellence, offering quality tools that perform under pressure, and supporting operations around the globe. Our product line includes casing scrapers and brushes, safety and kelly valves, internal blowout preventer valves, and surface test trees (flowheads).

Our tried-and-true PWC Cartridge™ style kelly and safety valves reflect our continued drive to provide tools that reduce downtime, improve safety, and add measurable value.

Operating out of our purpose-built facility in Breaux Bridge, Louisiana, we're equipped to meet today's demands with faster turnaround times, tighter quality control, and enhanced testing capabilities. M&M Oil Tools is here to support your success—every job, every time.

SURFACE TEST TREE

Engineered for deepwater completion, workover, and intervention operations, the M&M Surface Test Tree delivers high-performance well control with a compact, V-door-friendly design. Built to API 6A standards, it combines modular flexibility, high flow efficiency, and field-proven reliability.

Key Features & Benefits

- Modular configurable design for multiple applications
- Compact and lightweight for offshore handling
- High flow efficiency with large bore design
- Dual hydraulic valve actuators for redundancy and safety
- Field-proven in harsh environments

Standard Configuration

- 750-ton capacity
- 15,000 psi working pressure
- 7-1/16" 15M flanged lift sub
- Dual 6.5" hydraulic ball valves
- Dual 3-1/16" 15M side outlets

Competitive Advantage

- Faster redress with cartridge ball valve versus traditional systems
- Lower total cost of ownership through simplified maintenance
- Compact footprint

Quality & Compliance

- API Spec Q1 quality management system
- API 6A compliant design
- Full material traceability
- MTRs, pressure test reports, and COCs included
